

Double-Take Move for VMware Server Virtualization

Server Migration and Consolidation to VMware Virtual Servers

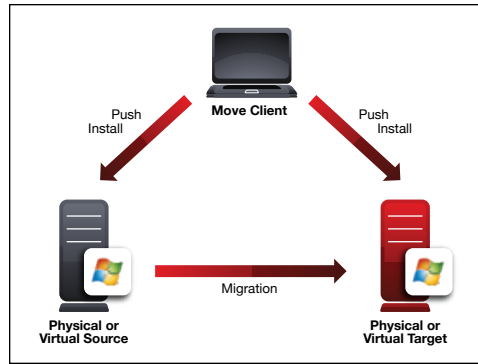

Your company has decided it is time to realize the benefits of virtualizing servers. Improved server utilization, reduced infrastructure costs, deploy and resize servers as performance needs dictate, and centralized management of critical servers. The benefits sound great. Here's the catch, when can you switch these physical servers over to virtuals without impacting the end users who are using the data and applications on these servers to close sales, support customers and run your day to day operations?

The Vision PowerPack, Double-Take Move for VMware Server Virtualization, is the ideal solution to keep your end users productive while Double-Take Move does the server migration in the background. The key to this solution is the use of real-time replication to capture byte level changes on the source server and replicate those bytes to your new VMware virtual server.

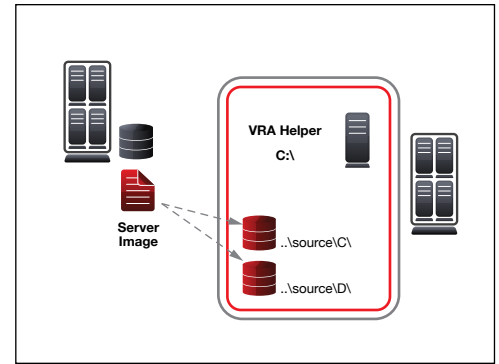

"The Double-Take Software solution for our P2V migration was so simple. It was just easy."

—Fernando Zangrande, Manager of Data Center Services

Migrate and Virtualize Your Servers to VMware With Little to No Downtime

Double-Take Move for VMware reduces the downtime needed for server migrations. With Move, your users remain productive, while Move replicates all the changes to the new server.

Virtual environment support

- Fine tune new virtual size, memory and processors.
- Migrate virtual to virtual.
- Automated provisioning of new virtual machine.

Easy administration and setup

- Automated setup and configuration.
- Central monitor screen for all migration jobs.
- Push install agents.

Flexible protection and recovery

- Hardware independent.
- Use your own network, locally or across the WAN.
- Cutover to new virtual environments on your own schedule.
- Migrate any application.

Protect and keep productive

- Process and replicate open files.
- Keep users on-line and productive while replicating changes in the background.

Vision Solutions. Easy. Affordable. Innovative.

Vision Solutions is a leading provider of high availability, disaster recovery and data management solutions for IBM Power Systems, Windows, Linux and Cloud Computing environments. Vision products ensure business continuity, increase productivity, reduce operating costs and satisfy compliance requirements.

Vision Solutions oversees a global network of business partners and services and support professionals to help you achieve your business goals.
