

Vision PowerPack for AIX Resilience for IBM PowerHA Users

Breakthrough Data Recovery for IBM PowerHA

Business leaders recognize the role system uptime and data protection have in ensuring their success, productivity and profitability. When systems fail, many core operations halt because the availability of information plays a critical role in the overall business.

The Vision PowerPack™ for AIX Resilience for IBM PowerHA Users complements the high availability protection provided by PowerHA and allows you to quickly add a cost-effective disaster recovery solution with true Continuous Data Protection (CDP).

Tony's Fine Foods Keeps Systems Moving

"You can't predict the future, and that's why we need the strongest possible backbone. With Vision Solutions and IBM, it's affordable for us as a medium-sized business: we've got the technology to keep systems moving for our customers, our employees, and our partner companies in the event of unexpected downtime."

– Mark Geery, IT Director, Tony's Fine Foods

The Next Level of Protection for PowerHA

This unique PowerPack protects your PowerHA environment, maximizing your investment in IBM technologies.

Complement PowerHA installations

- Adds remote disaster recovery to PowerHA's local high availability functionality to further protect applications and data.

Any-Point-In-Time Recovery with CDP

- Significantly reduces time and cost associated with recovering data.
- Provides granular recovery options that support more aggressive Service Level Agreements.

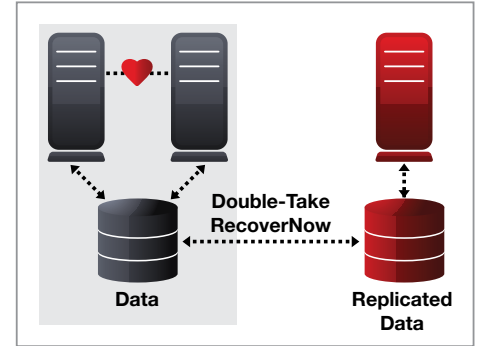

Maximize ROI with the Target System

- Allows for validation of disaster recovery readiness through virtual role-swaps.
- Improves productivity by allowing the use of the target system for backups, development and testing, reporting and training.

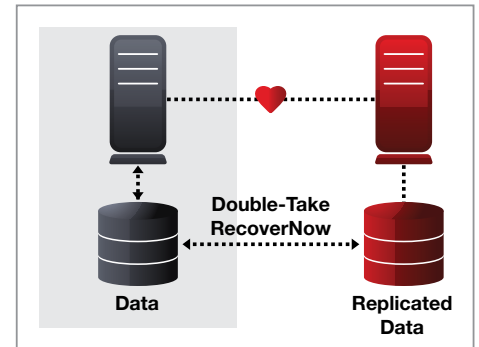

Migrate While Active

- Minimizes risk associated with server and storage migrations.
- Enables testing of the new environment while maintaining business continuity.
