

Vision Solutions Hosts Upcoming “State of IT Systems Resilience” Event
Annual event reveals latest IT infrastructure data along with real-world IT strategies and solutions

Irvine, Calif. – November 21, 2011 – Vision Solutions, Inc., the world’s leading provider of information availability software and services for Windows, Linux, IBM Power Systems and Cloud Computing markets will host an online webcast featuring The Fourth Annual State of IT Systems Resilience Report on Tuesday, December 6 at 10 a.m. CST.

Highlights

Those attending this special upcoming [State of IT Systems Resilience Report webcast](#) will discover the latest research findings regarding advanced user data protection and recovery strategies along with:

- Results of the 2011 State of IT Systems Resilience report Exclusive research
- How new HA and DR technologies including virtualization, cloud deployments and migration are helping your organization navigate the new landscape
- Computing system initiatives and performance breakthroughs
- There will also be time for questions with the presenting experts

Those participating in the event will be the first to receive this year’s State of IT Systems Resilience Report. The document not only includes revealing data but also addresses escalating storage needs, the explosion of user-generated data, the directive for 24/7 data and application availability, mobile computing and the proliferation of servers are just a few of the critical challenges confronting businesses this year.

Presenters include Juhi Jotwani, vice president of Defense Sales for IBM Systems Group. She leads a team to drive IBM technology and strategic solutions around cloud computing and analytics to DoD clients. Prior to this she was VP of Global Sales for small and mid-size customers. She managed a multi-billion dollar sales quota and leads the global teams in over 100 countries. Also presenting is Alan Arnold, executive vice president and CTO for Vision Solutions. Mr. Arnold is responsible for the global technology, services, support and strategy for the business. Since joining Vision Solutions in 2000, he has served in a variety of positions including EVP of Technologies and President and Chief Operating Officer of worldwide operations.
