

Vision PowerPack for POWER6 Migration

Valuable Protection in a Nonstop World

Vision's PowerPack™ for POWER6™ Migration is a cost-effective solution that virtually eliminates the enormous downtime traditionally associated with system upgrades and migrations.

It uses Vision's advanced high availability and data management technologies to rapidly copy business-critical data to your new Power System and keep it synchronized with your production system in real-time—without downtime. After validating your new AIX or IBM i environment, you can move users and processes in minutes.

Adventist Health Cuts Downtime

"Vision's product was the best. We cut our downtime to a fraction of what it would have otherwise been."

– Florencio Alcocer, Senior System Engineer

Kraft Migrates with Ease

"Vision played a key role in Kraft's successful migration. Everyone at Vision was professional and skilled on all levels. We couldn't have done it without them."

– Edna Sevilla, Project Manager

Vision Solutions. Easy. Affordable. Innovative.

Vision Solutions is a leading provider of high availability, disaster recovery and data management solutions for IBM Power Systems (IBM i and AIX). Affordable and easy to use, Vision products ensure business continuity, increase productivity, reduce operating costs and satisfy compliance requirements.

Take Your Time, Without Downtime

Today, you probably hurry through system upgrades and migrations because you need to shut down critical business applications for hours or days. And, as they say, haste makes waste. All of that rushing makes the process more error-prone than it should be. No more.

This specialized PowerPack utilizes Vision's exclusive Migrate While Active (MWA) offering to employ a more cautious approach, while virtually eliminating application downtime.

As IBM's largest high availability Premier Business Partner, Vision Solutions oversees a global network of business partners and services and support professionals to help you achieve your business goals.

Run in Parallel—It's Simple!

- Install the new server and let MWA synchronize your new system.
- While you validate the new system, MWA keeps the new system current.
- Finally, when you're ready to migrate, operations will pick up on the new system.

Leave Nothing Behind

- MWA mirrors critical data and applications for a successful upgrade or migration.

You're Not Alone

- Vision experts work closely with you to install and configure the software, enable and monitor synchronization, and perform the final switch.

- ❖ High Availability
- ❖ Disaster Recovery
- ❖ Systems and Data Management
