

# Double-Take Availability for IBM System x

## Valuable Protection for IBM System x Environments in a Nonstop World

*Information.* It's the currency of every business. Ultimately, it is among the most mission-critical resources in your organization, for every analysis, every decision, every action. Keeping information available is essential, but finding the right company with a long history of proven, reliable technologies that are easy to understand, install and maintain is the challenge. And Vision Solutions and IBM meet that challenge with the Availability Appliance for System x.

Double-Take Availability for IBM System x provides full-featured automated switching and failover for true high availability on physical and virtual Windows and Linux environments. Especially designed for VMware VSphere and Microsoft Hyper-V, Double-Take Availability also includes robust hardware and application-independent clustering with or without underlying logical replication. It's robust, yet affordable and very easy to manage.

And by adding IBM storage to the solution, there is an added simple, efficient and flexible approach to your HA storage needs.

## Protect and Optimize Your IBM System x Investment

### Real-time application and data protection

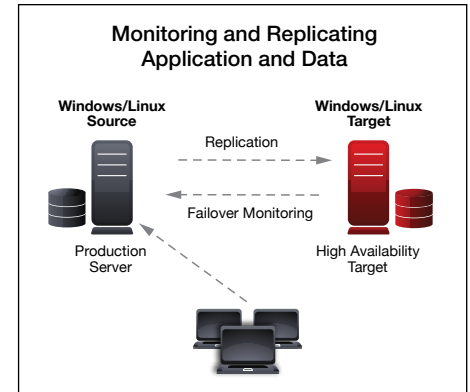

- High availability (HA) and disaster recovery for servers that cannot afford to be down.
- Easy-to-use failover solution for critical business applications.
- Supports Exchange, SQL, SharePoint, BES, Oracle and more.
- Protects Linux-based application data, such as Oracle and MySQL, and works on both physical and virtual machines running RedHat Enterprise Linux, Novell SuSE Linux Enterprise Server, CentOS Linux and Oracle Enterprise Linux.
- Protect your full server or just your critical applications and data.

### Flexible Deployment

- Application and hardware independent.
- Comprehensive high availability and disaster recovery for physical and virtual Hyper-V, VMware environments.
- Protect your System x servers locally or across the WAN via IP connections.

### Simple Management

- Auto-provision the creation of your virtual environment to protect your System x server.
- Protect your cluster nodes to different physical locations without using shared storage.

**Vision Solutions. Easy. Affordable. Innovative.**

Vision Solutions is a leading provider of high availability, disaster recovery and data management solutions for IBM Power Systems, Windows, Linux and Cloud Computing environments. Vision products ensure business continuity, increase productivity, reduce operating costs and satisfy compliance requirements.

Vision Solutions oversees a global network of business partners and services and support professionals to help you achieve your business goals.
