

EchoStream Quick Start

EchoStream Quick Start service from Vision Solutions is a sure way to jump-start your EchoStream software implementation project. EchoStream, the true continuous data protection (CDP) solution for AIX enables you to recover data from any point in time. EchoStream will deliver nearly instantaneous recovery of your applications and data at the push of a button.

AIX servers are handling greater business computing workloads, and uptime is more critical now than it has ever been. To ensure uptime with the successful implementation EchoStream, this Quick Start service offers hands-on technical assistance with everything from planning to implementation and testing, for a cost-effective and stress-free experience.

And to further underpin EchoStream Quick Start's value, Vision's technicians will provide instruction on how to facilitate daily maintenance and perform basic troubleshooting tasks to keep EchoStream at the peak of its performance.

Vision's EchoStream Quick Start service includes three important phases:

- First, Vision technicians conduct a project-planning workshop with you and your team, to clearly identify your requirements and objectives.
- Next, they will prepare and deliver a detailed Solution Planning Report.
- Finally, with your assistance, Vision technicians install, configure and tune EchoStream, as defined in the Solution Planning Report, on one source and one target node. As part of this service, you and your team are trained on how to start, stop, administer and perform basic troubleshooting for EchoStream.

To learn more about Vision's EchoStream Quick Start services, call **800-957-4511** or visit **visionsolutions.com**.

Benefits

- Very short implementation project cycle and better use of staff.
- Assured Optimal configuration and customized protection.
- Immediate, hands-on confidence in managing EchoStream.

Deliverables:

- EchoStream Solution Planning Report.
- Installation and configuration of the EchoStream solution on a pair of nodes (one source and one target).
- EchoStream Skills Transfer.

High Availability Disaster Recovery Systems and Data Management
