

# Vision Availability Appliance Powered by IBM

Fastest Way to HA!  
Select. Connect. Protect.

---

**Information.** It's the foundation on which you build your business. Ultimately, it is among the most mission-critical resources in your organization, for every analysis, every decision, and every action. Keeping information available is essential, but finding the right company with a long history of proven, reliable technologies that are easy to understand, install and maintain is the challenge. And Vision Solutions and IBM meet that challenge with the Vision Availability Appliance Powered by IBM.

---

## Protect and Optimize Your IBM Investments for Power Systems and System x

Easy information availability is our driving passion. Vision and IBM lead the industry in quality and innovation, in solutions that are both comprehensive and truly easy to use. And Vision Solutions is unmatched in the range of IBM platforms we support and our reputation for delivering real results and clearly measurable return on investment. Whether your business-critical systems run on IBM System x Windows or Linux, IBM AIX or IBM i, whether your business relies upon a single server, hundreds of virtualized environments, or has data centers around the globe, Vision Solutions has the technologies you need to easily achieve and maintain the level of information availability for your IBM platform that your organization requires.

And with the introduction of the Vision Availability Appliance Powered by IBM, you can now get access to the software and hardware you need in one package. Your Vision Solutions software will be pre-installed on one of the IBM hardware configurations of your choice by experts at Arrow OCS and shipped to you as one unit. The Availability Appliance is simple to order through your local Vision Solutions Reseller and it is a fast and flexible availability solution for your organization. You can choose from multiple configurations for access to easy and affordable high availability protection.
