FOR IMMEDIATE RELEASE

Vision Solutions Hosts “Resilience for a Smarter Infrastructure: Real Stories. Real Options”
Web event to offer real-world strategies and solutions to prevent system and application downtime

IRVINE, Calif. (June 15, 2009) Vision Solutions, a leading high availability and disaster recovery solutions provider in IBM’s Power Systems markets (NYSE: **IBM**), will host a complimentary webcast Tuesday, June 23 at 10 a.m. (CDT) titled **Resilience for a Smarter Infrastructure: Real Stories. Real Options**. The one-hour webcast highlights real-world business continuity options that fit any situation, data or budget. It also shows how these options are being used by specific companies to prevent system and application downtime.

IBM’s Worldwide Vice President for ISV Solutions Ms. Stephanie Carmel and Vision Solutions Chief Technology Officer and EVP Mr. Alan Arnold will lead the in-depth discussion and will also show how IBM’s new Dynamic Infrastructure initiative and Vision’s Resilience 2.0 technologies help take companies to the next level of business continuity. Additionally, attendees will learn about relevant case studies and purchase incentives.

"In today’s world, managing costs and risks are critical to businesses of every size. During this resilience webcast, we will discuss how IBM & Vision are offering integrated, affordable solutions that help our customers reduce costs, manage their risks and implement a more robust dynamic infrastructure," says Carmel. "We will show examples of companies who have protected their data and ultimately better protected their businesses while improving their competitiveness."

"IT managers and executives from organizations of all sizes can glean insight and information from this **resilience** webcast," says Arnold. "Protecting vital business operations is easier – and more affordable – than what is assumed. And in today’s nonstop business climate, waiting to implement a data protection system is extremely risky so we encourage all IBM Power Systems users to join this webcast."

Attendees will receive a copy of **Next-Generation Disaster Recovery and Availability Technologies for IBM Power Systems**, a comprehensive 29-page white paper on Power Systems availability technologies. To register for the complimentary webcast, please visit **Resilience for a Smarter Infrastructure: Real Stories. Real Options**.
