

Vision Solutions. Easy. Affordable. Innovative.

“I absolutely required a high level of reliability, ease of use, and support. Vision not only met my expectations—it outperformed them.”

Greg Dauenhauer, IT Director,
The Broadmoor Hotel

iTera™, MIMIX® and
ORION™ solutions for
i5/OS, AIX and Windows
applications

Vision Solutions is a leading provider of high availability, disaster recovery, systems and data management solutions.

Our iTera™, MIMIX® and ORION™ solutions keep business-critical information continuously protected and available. If your organization relies on i5/OS®, AIX® or Windows® applications, Vision products are the easy and affordable way to ensure business continuity, increase productivity, reduce operating costs and satisfy compliance requirements.

Ensure Nonstop, Resilient Business Operations

Vision high availability (HA) solutions deliver nonstop business continuity, boost productivity and accelerate business processes. Innovative, easy to use switching and replication solutions eliminate costly IT downtime.

iTera HA for i5/OS

The easy, affordable and worry-free way for small and medium sized businesses to protect their critical System i applications and data. iTera HA virtually eliminates both planned and unplanned IT downtime with only minutes per day of administration.

MIMIX HA for i5/OS

Built for the most demanding enterprises, MIMIX HA virtually eliminates planned and unplanned IT downtime with automated features that minimize HA administration and ensure HA integrity. Includes MIMIX continuous data protection (CDP) technology for easy, any point-in-time data recovery.

ORION HA for i5/OS

Delivers maximum protection and continuous availability for critical applications in large and sophisticated enterprise environments. With innovative, best-of-breed features, ORION HA offers proven reliability, performance, scalability and flexibility.

HA Cluster™ for AIX

Keep your AIX environments resilient and protected, easily and more affordably than with other solutions. Continuous server monitoring and immediate, automated failover to an alternate server minimizes both planned and unplanned downtime.

GeoCluster™ for Windows

GeoCluster from Double-Take extends the capabilities of Microsoft® Cluster Service (MSCS) with real-time data/application protection and automated failover for quick recovery.

Double-Take® for Windows

The world's most relied upon solutions for protecting Microsoft Windows® environments. Get the highest levels of availability for business critical data and applications including those running on Exchange, SQL Server, SharePoint and Oracle.

Protect Critical Data, Recover Faster

Vision disaster recovery solutions protect critical information and recover lost data in a fraction of the time and effort of traditional tape backup solutions. Affordable, automated solutions deliver the power of continuous data protection and the flexibility of in-house or hosted recovery options.

iTera Vault for i5/OS

Easy, automated data protection and disaster recovery that frees you from planned downtime for tape backups. Reduce recovery time from days to a few hours. Works with i5/OS®, AIX® or Windows® platforms running on System i.

EchoStream™ for AIX®

A true continuous data protection (CDP) solution that delivers any point-in-time data recovery at the push of a button. Instantly reverse accidental or malicious data corruption without the time/labor required for recovery from tape.

Supercharged Performance for Systems and Data

Vision systems and data management solutions accelerate the performance of your most important IT and information assets while significantly reducing labor, complexity and daily administration. Get more out of the systems and data that keep your business moving forward.

Vision Director™

Automatically monitors, manages and optimizes System i servers, databases and application environments for breakthrough performance, reduced IT labor and the freeing up of system resources.

Upgrade/Migrate While Active™

Empowers businesses of all sizes to rapidly migrate their applications and data to a new System i without downtime or risk. Easily switch users to a new box in just minutes without interrupting your business operations.

Reorganize While Active™

Reorganize files without interrupting users or stopping business processes. Reorganize While Active lets you improve system performance without downtime or lost productivity.

Convert While Active™

Perform software upgrades and data conversions without the lost productivity, lost revenue and increased costs of application downtime. Convert While Active minimizes downtime during even the most extensive data conversions and upgrades.

Vision Data Manager™

Automates the modeling, testing, purging and archiving activities for System i application environments. Free up disk space, preserve critical records and improve response times with easy archiving that doesn't interrupt users or business processes.

Vision Integrator™

Copies, filters and transforms data across multiple operating systems, databases and hardware platforms in real-time. Achieve your most complex data integration and replication requirements with point-and-click simplicity.

Vision replicate1™

Delivers enterprise-wide, real-time data sharing across all platforms, applications and databases—without programming. Perfect for key initiatives like business intelligence, migration, data/application integration and data warehousing.
